

# Times Tables

Dear Parents,

A secure knowledge of times table multiplication and division facts is essential in order to be able to progress through the Primary Curriculum for mathematics.

National Curriculum guidance states that:

- By the end of Year 2, a child should know the 2, 5 and 10 times tables
- By the end of Year 3, a child should know the 3, 4 and 8 times tables
- By the end of Year 4 a child should know by heart and be able to recall with speed and accuracy all times table facts up to  $12 \times 12$  and their associated division facts.

Obviously, all children learn at different speeds and some children find learning and remembering times table facts easier than others. With this in mind, I have compiled a list of resources that you and your child may find useful to support learning times table facts.

Regular practise is essential if your child is still insecure with their times table facts.

I hope you will find these resources useful and enjoy using them with your child to ensure that they know and sharpen all their times table facts.

Please do come and talk to me if you need any more information.

Warm regards,

Chris Wild

## Resources:

[Furious 48 graded test papers](#)

We use these in class to track times tables progress. You can print off practise sheets for use at home, or your child can simply ask for some extra copies to be sent home.

[Times Table Rockstars](#) also available as an app

[Interactive Resources Multiple Wipeout](#) also available as an app
